DIARY NOTES

DD/S

11 March 1965

1. Larry Houston called about the overrun of $100,000 in the A & E plans for the Printing Services Division's plant about which Alan Warfield had alerted me. Larry was very much concerned about this and thought, as I did, that as a minimum we would have to go back to our House and Senate Appropriations Committees, and he questioned whether they have the authority to approve any expenditure in excess of the $46 million. (I therefore advised Alan Warfield that we will have to build a printing plant within the money available and asked him to inform the General Services Administration, the architect, and anybody else who is involved at this point.)

3. [redacted] briefed us today on the Interrogation Research Division, and I was pleased to learn that, in contrast to his briefing of last year, there is now considerable work being done in the research and development field. DD/S&T [redacted] has a contract with [redacted] which I understand is the same project the Medical Staff tried to launch several years ago. (In this connection, I want to invite [redacted] to give me a briefing on this project sometime.)
